

# STRIMECH SQUARE WRAPPED BALE HANDLER

The Strimech (606) Square Wrapped Bale Handler makes short work of moving and stacking big square bales. Its robust design and secure grip ensures safe, reliable transportation.

**NEW!**

## Rear Grip Design

The handler features a hydraulically-operated back arm that gently and securely grips the bale from the back.

This makes the handler ideal for loading bales on a trailer or at the stacking site.

## Rotating Roller

The front of the handler is fitted with a rotating roller. This allows the handler to glide along the face of wrapped bales or slip between two closely stacked bales, without damaging the plastic.

Adjustment for different bale sizes.

The handler can be easily adjusted to cater for different bale sizes.
