

STRIMECH X-FORM FRONT LOADER GRABS

X-Form Professional loader power grabs are manufactured from high-strength steel and feature our unique double box technology and have an enclosed back which helps keep the carriage and hydraulics clean, making them the ideal manure or silage grab.

- High strength, low alloy X-Form steel
- Enclosed back helps keep carriage and hydraulics clean
- Unique double box technology
- Available with KV tines top and bottom or Hardox tines in base or option of Hardox tines top and bottom

Together with our unique engineering technologies, X-Form steel enables us to deliver the superior strength of a professional range, whilst offering the best value for money.
